

CRAZY CHEMWORKS

This action packed after-school program is bubbling over with classic experiments and crazy concoctions! Perform spectacular hands-on activities using real tools, and week by week you'll build your own chemistry set!

Learn the difference between Chemical vs. Physical changes, and swirl an acid-base mixture into a volcanic explosion with the **ACTION FLASK!**

Work with dry ice, learn the states of matter, and take home a reusable **THERMO-CUP** made with a color-changing, thermo-sensitive ink!

Get slimed! Work with synthetic slime polymers, compete in our Slime Olympics, and become a slime chef when you mix your own cup of **SLIME** to take home!

Get into scientifically sticky situations! Reveal what sticks and why, and learn the secrets of adhesion with **PROFESSOR BEAKERDUDE!**

Start exploring the building blocks of matter, and use **ATOMIC COINS** to model how atoms connect!

Experiment with the power of phosphorescence, and take home a shining display of glow-in-the-dark science with your **GLOW CARD!**

Take part in basic lab work and use the tools of the trade! Take home some **GRADUATED GEAR** (an essential measuring tool in any lab)!

Examine pH values of different liquids and experiment with safe reactions in your **REACTION TUBE!**
