Mad Science Summer Camps at the Parsippany PAL!

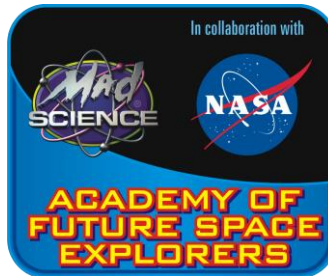

Sparkling
Imaginative Learning

We are proud to present our Mad Science summer camp program. We will be offering two weeks of fun, crazy, wild science. Plan to attend all of them for a Mad Summer of Science!

NASA Academy of Future Space Explorers (Ages 5-10)

August 6-10 2:00pm-5:00pm 5 day camp \$195

Students set off on a voyage to discover the Solar System. We will explore topics such as Planets and Moons, Sun and Stars, Space Phenomena, Rocket Science and Space Travel, Space Technology and Living in Space! Our camp culminates with a rocket launch or two and each camper will make their own Mad Science Rocket to take home!

BRIXOLOGY! (Ages 7 – 10)

August 13-17 2:00pm-5:00pm 5 day camp \$195

This new STEM engineering program allows kids to step into the shoes of an engineer by using LEGO® bricks to build a different engineering-themed project every day; exploring engineering fields including mechanical, structural, aerospace, nautical, and bioengineering; using critical thinking, cooperation, and creative problem-solving to test and improve creations; and experiencing extended learning with a take-home project to reinforce each concept.
